

PURCHASE ORDER ATTACHMENT TQA-36A-01

STATISTICAL ANALYSIS & ACCEPTANCE TEST SOFTWARE (STAATS)

Supplies delivered against this Purchase Order require supplier's participation in the Statistical Analysis & Acceptance Test Software (STAATS) program, whereby supplier product acceptance data is provided to Raytheon using the STAATS software package. All acceptance test data shall be analyzed by the supplier using the Raytheon STAATS software package. The supplier shall ensure compliance to Raytheon drawings and specifications and use the STAATS data to document/identify performance trends and capabilities with the aim of test and cost reductions.

Specific STAATS program requirements are as follows:

- A) Data collected by supplier's acceptance test equipment (ATE) shall be analyzed by the supplier using the STAATS software package prior to submittal to Raytheon. The formatted STAATS data shall then be forwarded to Raytheon for review using standard STAATS format and file extensions.
- B) The supplier shall maintain all data provided to Raytheon in electronic format for the period of time prescribed in the Raytheon procurement contract.
- C) The STAATS requirement applies to this Purchase Order, beginning with the first shipment of parts.
- D) Raytheon Systems will provide the STAATS software package to the supplier for implementation.
- E) All STAATS data delivered to Raytheon shall be identified with the Raytheon Part Number, Purchase Order, Serial Number, and the name of the company sending the data.
