

## **PURCHASE ORDER ATTACHMENT TQA-48-01**

### **SOFTWARE AND FIRMWARE QUALITY CONTROL PROGRAM**

Seller shall have a process to control the quality of software and/or firmware to produce and/or test delivered products and software embedded in delivered products.

The Seller shall be able to show that the software and/or firmware process provides mechanisms for correctness verification of the software and/or firmware, as well as providing configuration control of the software and/or firmware.

The Seller shall ensure that only properly approved versions of the software and/or firmware are available for loading into delivered products or for testing delivered products.
